Electric broom/multifunction carpet cleaner

H pro eF+M29

## STRENGTHS

- Ideal for mixed environments: carpet - floor
- Light, quiet and very easy to handle
- Patented universal brush for floors and carpets
- Backpack kit (optional)
- Blower (optional)
- Accessories on board
- Quick release connections
- Integrated dry-cleaning system

H pro eF+M30e

H pro eF+M38e

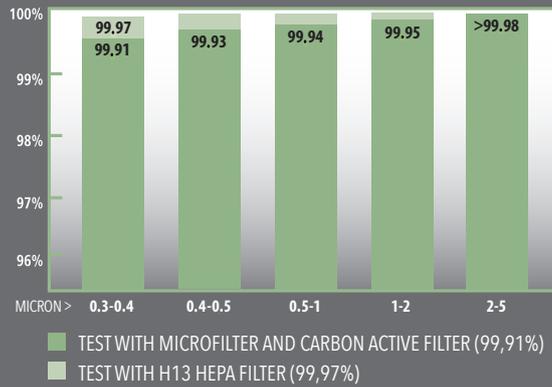

## IDEAL FOR ANY KIND OF ENVIRONMENT

Thanks to its quick release neck, in a few seconds you can change from the electric broom function to the professional dual motor carpet cleaner. The M30e and M38e power nozzles equipped with four wheels, height adjustment and electronic overload control are perfectly adaptable to any kind of carpet and rug. Thanks to the 5000 RPM brush roller with centre convergent bristles and its powerful suction, HEALTHCARE pro is able to deeply remove and suck dust and debris for a better living in healthier and cleaner rooms.

The filtration efficiency tests done on Lindhaus machines by the independent laboratory SLG (Germany) show the result of its sophisticated construction technology. Thanks to the brush rolls with center convergent bristles that rotate at 5000 RPM/min. and the powerful suction, the Lindhaus carpet cleaners are able to remove and deeply clean dust and debris in order to live in healthier and cleaner environments. CRI (Carpet & Rug Institute U.S.A.) and SLG (Germany) have certified all Lindhaus carpet cleaners for their superior ability to remove dust that is fully retained.

## NET FILTRATION EFFICIENCY

## ELECTRIC BROOM

Powerful, silent and very handy, it is standard equipped with the new patented M29R universal nozzle. The suction is perfect all around and the centre bristles are self cleaning.

For wood and marble floors a natural felt base is available (optional) and can be applied to the same nozzle; the new floor tool M32R is available for large surfaces.

The machine can be locked in vertical position and stands up on its own, making its use even more practical.

## DRY CLEANING

In a few seconds and without any tool you can install the DCS converter to transform the M30e and M38e into a dry carpet cleaner.

The sanitization of mattresses is made the same way but using the soft brush roller and the appropriate dedicated brush roller cover.

The treatment is carried out thanks to the new product "LS500 Crystal" which removes stains and encapsulates the dirt in microcrystals.

## NET FILTRATION EFFICIENCY

The 5-stage filtration with the exhaust 3M Filtrete microfilter can be enforced with the Hepa filter or the activated carbon/microfilter making the HEALTHCARE pro a perfect machine for healthcare environments, hotels, restaurants, offices etc.

The filtration efficiency tests done on Lindhaus machines by the independent laboratory SLG (Germany) show the result of their advanced building technology.

## EXCLUSIVE ACCESSORIES

Healthcare pro is equipped with several standard and optional exclusive accessories.

The "De Lux" accessory kit includes: 1-4 extensible hose equipped with swivel sleeve and handle with air control, ABS telescopic wand, upholstery tool, rotating round dusting brush, brush for telescopic crevice tool, blower.

## DEEP MATTRESS CLEANING

HEALTHCARE pro eco FORCE can be equipped with an optional mattress kit made of a soft brush roller and a dedicated brush roller cover to use with the M30e power nozzle.

The brush roller runs at 5000 RPM making a vibration on the mattress which in connection with the brushing and the powerful suction grants a deep efficient cleaning.

Important 5-star hotel chains have certified this machine for the "clean rooms" (clean rooms for allergy sufferers).

## BACK PACK KIT

With an easy back pack kit (optional) Healthcare pro becomes a practical and light weight back pack unit that allows the user to easily move in uncomfortable and narrow environments like cinemas, theatres, stairs etc.

## TECHNICAL SPECIFICATIONS

## HEALTHCARE pro eco FORCE

Working width - vacuum mm (in)	290 (11.4)	
Working width - brush mm (in)	290 (11.4)
