RAISE YOUR EXPECTATIONS

The **PB** series was designed to improve the cleaning performance of any vacuum cleaning system. From back-packs to built-in systems they will provide an extraordinary increase in cleaning efficiency. They can be retrofitted to upgrade almost any canister vacuum cleaner. Lindhaus engineered **PB** series to be the ultimate cleaning accessory. It is equipped with the most sophisticated technical features in the world.

ENGINEERED TO LAST

Long service life and low vibration levels, are achieved with superior engineering and precision manufacturing. All rotating components are balanced and protected by electronic controls.

ELECTRONIC LOGIC

Proven integrated circuits protect the motor and the transmission from overload and assist the operator in making the most efficient brush height setting.

DESIGN SUPERIORITY

The robust and efficient power brush can pick up everything the others leave behind. It requires no maintenance and offers a 3 year warranty on timing belt, motor and electronics.

Thanks to the rubber wheels and the microswitch that turns off the motor in upright position, transport from carpets to hard surfaces is carried out without wasting time and without raising dust.

DRY CLEANING SYSTEM (Standard on PB12e and PB14e)

The patented Lindhaus dry cleaning system is the perfect solution to clean and sanitize rugs and carpets without risks and with little effort. Thanks to a suction closing plate, the **PB12e** and **PB14e** are able to make the Lindhaus LS500 Crystal detergent penetrate deeply between the fibres, which in addition to cleaning, reduces noticeably the presence of mites and bacteria.

PB15e, PROFESSIONAL FOR HEAVY DUTY APPLICATIONS

This professional heavy duty power nozzle is equipped with stainless steel shoe plate, tool free quick brush exchange, side cylinders for easy along the wall cleaning, rear door for easy replacement of the motor protection filter, a more sophisticated electronic logic which controls the overload, motor shut off, motor soft start and maintains the brush speed constant.
